

Advanced Health Screen

Our most flexible health screen gives a choice of levels to suit the needs of your workforce.

Key Features

- Choose from a range of 4 levels to suit your budget and workforce needs
- Highly convenient with tests carried out in the workplace
- Body Profile Tests to highlight fat levels, body water levels, bone mass, glucose and cholesterol
- Key Heart Tests including ECG and Cardio Fitness Test
- Vital Organ Tests to identify kidney and liver disease plus lung function
- Woman only tests for osteoporosis (Level 4) and thyroid (Level 3 & 4)
- Cancer Checks including bowel (Level 3 & 4) and prostate (Level 2–4)
- Lifestyle Analysis and recommendations plus a Health Advice Helpline

Why Health Shield?

Our Health Screening service provides a range of tests to identify current health issues and highlight any future risks. Health screens are conducted in the workplace and a health screening practitioner will create an on-site private clinic which means that employees don't need to travel far for an appointment in the middle of a busy working day. We manage the whole screening process from start to finish making it as convenient as possible for both you and your employees.

At the start of each programme, employees are asked to complete a health and lifestyle questionnaire in advance of the screening to identify key concerns. Each employee is provided with a detailed results report including supportive advice based on his or her test outcomes. As an employer, you will receive a company health report that provides valuable insights about your workforce and can help shape your company's wellbeing strategy.¹

At Health Shield we pride ourselves on delivering a full health support service and we won't just leave employees to work out what their test results mean. We provide early notification of any critical results supported by a helpline open all year round.
