

Premium Health Screen

Our most comprehensive health screen offers peace of mind for all employees with a full range of tests.

Key Features

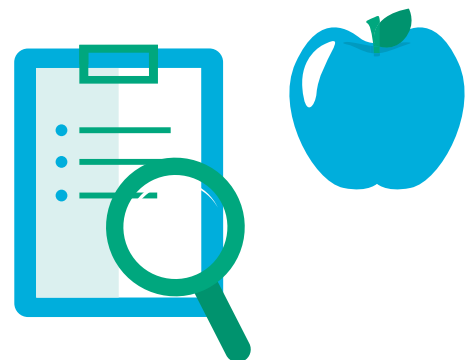

- Provides a comprehensive range of 32 different health tests
- Highly convenient with tests carried out in the workplace
- Includes Body Profiling Assessment and tests to identify heart, lung and vital organ health risks
- Cancer Checks include bowel and prostate
- Blood Profile tests to identify arthritis, diabetes and gout health risks
- Woman only tests for osteoporosis and thyroid
- Lifestyle Analysis and recommendations plus a Health Advice Helpline

Why Health Shield?

Our Health Screening service provides a range of tests to identify current health issues and highlight any future risks. Health screens are conducted in the workplace and a health screening practitioner will create an on-site private clinic which means that employees don't need to travel far for an appointment in the middle of a busy working day. We manage the whole screening process from start to finish making it as convenient as possible for both you and your employees.

At the start of each programme, employees are asked to complete a health and lifestyle questionnaire in advance of the screening to identify key concerns. Each employee is provided with a detailed results report including supportive advice based on his or her test outcomes. As an employer, you will receive a company health report that provides valuable insights about your workforce and can help shape your company's wellbeing strategy.¹

At Health Shield we pride ourselves on delivering a full health support service and we won't just leave employees to work out what their test results mean. We provide early notification of any critical results supported by a helpline open all year round.
